

# **Recent Progress in Pulsed Fiber Lasers for Materials Processing and Remote Sensing**

**José António Salcedo**<sup>1</sup>

Multiwave Photonics, R. Frederico Ulrich 2650, Moreira da Maia, 4470-605 Porto, Portugal

Specially designed Pulsed Fiber Lasers based on a MOPA (Master Oscillator Power Amplifier) architecture now allow optical pulse shaping and pulses on demand, greatly extending the flexibility provided to the user in the context of materials processing as well as LIDAR and remote sensing.
